OWNERS MANUAL

IT IS THE RESPONSIBILITY OF THE OWNER AND/OR OPERATOR TO PROPERLY USE AND MAINTAIN THIS EQUIPMENT. CAREFULLY READ AND UNDERSTAND THE INSTRUCTIONS AND WARNINGS IN THIS MANUAL BEFORE OPERATING THIS EQUIPMENT.

If the operator is not fluent in English, the instructions and warnings shall be read and discussed in the operator’s native language, making sure the operator comprehends the contents.

This equipment complies with OSHA Standards where applicable.

WARNING

DO NOT exceed the stated maximum working pressure of the pump or of the lowest rated component in your system.

DO NOT alter or modify any part of this equipment.

DO NOT operate this equipment with combustible gas.

DO NOT attempt to repair or disassemble the equipment while the system is pressurized.

TIGHTEN all fluid connections securely before using this equipment.

ALWAYS read and follow the fluid manufacturer’s recommendations regarding fluid compatibility, and the use of protective clothing and equipment.

CHECK all equipment regularly and repair or replace worn or dam-aged parts immediately.

IMPORTANT: Failure to heed these warnings including misuse, over pressurizing, modifying parts, using incompatible chemicals and fluids, or using worn or damaged parts, may result in equipment damage and/or serious personal injury, fire, explosion, or property damage.

Model No. 84933, 84934
STUB PUMP
Series “D”

5:1 RATIO, OUTPUT - 6 GPM
MIN. AIR PRESSURE - 40 PSI
MAX. AIR PRESSURE - 200 PSI
MAX. OUTPUT PRESSURE - 1000 PSI
**WARNING**

Systems which will be dispensing fluids under pressure may need to be protected by using a thermal relief kit, which will safely limit the pressures caused by thermal expansion. Please contact your local Lincoln distributor and refer to Service Page Section K5, Page 31 for more details. Failure to include thermal relief protection may cause damage not covered under Lincoln’s warranty policy.

**WARNING**

Pressure Relief Procedure
To reduce the risk of serious bodily injury, including splashing in the eyes or on the skin, always follow this procedure whenever you shut off the Pump, when checking or servicing any part of the system, and when installing, cleaning or changing any part of the system.

1. Disconnect the air to the pump.
2. Point the dispensing valve away from yourself and others.
3. Open the dispensing valve until pressure is relieved.

If you suspect that the dispensing valve or hose is completely clogged, or that pressure has not been fully relieved after following the steps above, VERY SLOWLY loosen the hose end coupling and relieve pressure gradually, then loosen completely. Now clear the valve or hose.

**INSPECTION INSTRUCTIONS**

If overpressurizing of the equipment is believed to have occurred contact the factory authorized warranty and service center nearest you for inspection of the pump.

Specialized equipment and knowledge is required for repair of this pump. Contact the factory authorized warranty and service center nearest you for repairs or adjustments other than maintenance specified in this manual.

Annual inspection is recommended by the factory authorized warranty and service center nearest you.

A list of factory authorized warranty and service centers is available upon request.

**DAMAGED PUMPS**

Any pump that appears to be damaged in anyway, is badly worn or operates abnormally, shall be removed from use until repairs are made. Contact the factory authorized warranty and service center nearest you for repairs.

**OPERATION**

### Flushing

Flush the supply lines and hoses with compatible solvent and blow dry with air before connecting them to the system. This is to purge any contaminants such as dirt, moisture or metal shavings that could damage the pump or system components.

Then flush the pump. The pump was tested in lightweight oil, which was left in to protect the pump from corrosion. Flush out the pump before connecting it to the system if the oil could contaminate the fluid you are pumping.

**WARNING**

When flushing the pump with solvents, to reduce the risk of injury from splashing or static sparking, always hold a metal part of the dispensing valve firmly to the side of a grounded metal pail, and use the lowest possible fluid pressure when flushing.

**WARNING**

This pump can develop 1000 PSI maximum working pressure, at 200 PSI maximum incoming air pressure. Be sure that all equipment and accessories are rated to withstand the maximum working pressure of this pump. DO NOT exceed the maximum working pressure of any component or accessory used in the system.

In a circulating system, the pump runs continuously and slows down or speeds up as supply demands, until the air supply is shut off.

In a direct supply system, with adequate air pressure supplied to the motor, the pump starts when the gun or dispensing valve is opened and stalls against pressure when it is closed. If the pump accelerates quickly or is running too fast, stop it immediately. Check the fluid supply and refill it if necessary. Prime the pump to remove all air from the system, or flush the pump and relieve pressure.

**MAINTENANCE**

**WARNING**

Always follow the Pressure Relief Procedure Warning whenever you stop spraying and before checking or repairing any part of the system, to reduce the risk of serious bodily injury.

If you are pumping fluid which dries, hardens or sets up, flush the system with a compatible solvent as often as necessary to prevent a buildup of dried fluid in the pump or hoses.

**Corrosion Protection for Carbon Steel Pumps**

Water, or even moist air, can cause your pump to corrode. To help prevent corrosion, NEVER leave the pump filled with water or air. After normal flushing, flush the pump again with mineral spirits or oil-based solvent, relieve pressure, and leave the mineral spirits in the pump. Be sure to follow all steps of the Pressure Relief Procedure Warning.
INSTALLATION

The typical installation and pump mountings, shown are only a guide for selecting and installing system components. Contact your Lincoln Representative for assistance in designing a system to suit your particular needs.

Mount the pump to suit the type of installation planned. Refer to the pump dimensional drawing for mounting layout.

An air line filter/regulator/lubricator is recommended for use with your Lincoln pump to remove harmful dirt and moisture from your compressed air supply, and to provide automatic air motor lubrication.

Be sure all air and fluid hoses are properly sized for your system.

TIGHTEN all fluid connections securely before using this equipment.

TYPICAL PUMP MOUNTINGS

NOTE: When pumping from bulk tanks, use 82439 Low Level Cut-Off to maintain prime and prevent air from being pumped through meters when tank is empty. Refer to Service Page K1-1

MODEL 84934

* REFER TO SEPARATE INSTRUCTIONS: SECTION G9, PAGE 2 SERIES
DISASSEMBLY PROCEDURE

1. Remove 11470 Valve Cap, 11472 Trip Rod Pin.
2. Unscrew four 51009 Nuts from 241512 Tie Rods and lift 236612 Air Valve Casting off of 61447 Air Cylinder.
3. Remove 11904 Packing Nut and 11905 Packing Cap from air valve casting.
4. Remove four 236868 Screws 236286 Cover.
5. Remove four 236869 Screws Toggle Plate and 11475 Trip Assembly and 11947 Trip Sleeve.
6. Remove four 236870, 55138 Springs, 45605 Valve Guide Plate and 83063 Valve Slide and Seat kit and 38162 Valve Gasket.
7. Unscrew 245425 Trip Rod Packing Nut from air valve cast- ing and remove all packing parts.
8. Unscrew 241511 PumpTube from 245401 Outlet Casting.
9. Remove 61447 Air Cylinder and 62383 Air Passage Tube from outlet casting.
10. Place wrenches on both 245424 Piston Bolts (one at end of 241510 Piston Rod) and loosen.
11. Remove air piston, pump piston, piston rod and trip rod from outlet casting.
12. Unscrew 245426 Gland Packing Nut from outlet casting and remove all gland seal parts.
13. To reassemble reverse procedure.

Note: If complete disassembly is required, replace all gaskets, o-rings & packings. (Order Repair Kit.)

IMPORTANT:
START FASTENERS BY HAND TO AVOID STRIPPING THREAD WHEN RE-ASSEMBLING.

### TROUBLESHOOTING

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Airmotor does not operate</td>
<td>Check air supply to pump. Replace 11475 Trip Shoe Assembly, 11947 Tie Rod and 91331 Toggle Plate.</td>
</tr>
<tr>
<td>2. Air seepage from air exhaust while pump is not operating.</td>
<td>Replace 11482 Valve Slide, 14919 Valve Seat, 38162 Valve Gasket, 236835 Trip Rod Packing and 236616 Gasket and 33039 Gasket.</td>
</tr>
<tr>
<td>3. Loss of pressure, volume or continuous operation of pump when not in normal use.</td>
<td>Clean piston seat and ball foot valve. If Worn or Damaged: Replace 230002 piston, 230004 ball check and 261077 piston packing. Check inside diameter of 241511 Pump Tube, if scored replace pump tube.</td>
</tr>
<tr>
<td>4. Excessive amount of air in lubricant or excessive amount of lubricant coming from air exhaust. Note: Some lubricant exhausts with air normally.</td>
<td>Replace 245427 Gland Packing.</td>
</tr>

Lincoln Industrial Standard Warranty

LIMITED WARRANTY
Lincoln warrants the equipment manufactured and supplied by Lincoln to be free from defects in material and workmanship for a period of one (1) year following the date of purchase, excluding therefrom any special, extended, or limited warranty published by Lincoln. If equipment is determined to be defective during this warranty period, it will be repaired or replaced, within Lincoln’s sole discretion, without charge.

This warranty is conditioned upon the determination of a Lincoln authorized representative that the equipment is defective. To obtain repair or replacement, you must ship the equipment, transportation charges prepaid, with proof of purchase to a Lincoln Authorized Warranty and Service Center within the warranty period.

This warranty is extended to the original retail purchaser only. This warranty does not apply to equipment damaged from accident, overload, abuse, misuse, negligence, faulty installation or abrasive or corrosive material, equipment that has been altered, or equipment repaired by anyone not authorized by Lincoln. This warranty applies only to equipment installed, operated and maintained in strict accordance with the written specifications and recommendations provided by Lincoln or its authorized field personnel.

THIS WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

In no event shall Lincoln be liable for incidental or consequential damages. Lincoln’s liability for any claim for loss or damages arising out of the sale, resale or use of any Lincoln equipment shall in no event exceed the purchase price. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, therefore the above limitation or exclusion may not apply to you.

This warranty gives you specific legal rights. You may also have other rights that vary by jurisdiction.

Customers not located in the Western Hemisphere or East Asia: Please contact Lincoln GmbH & Co. KG, Walldorf, Germany, for your warranty rights.

Lincoln Industrial Special Limited Warranties

SPECIAL LIMITED 2 YEAR WARRANTY-
SL-V Series, Single Injectors-85772, 85782, and Replacement Injectors-85771, 85781
Lincoln warrants the SL-V Injector series to be free from defects in material and workmanship for two (2) years following the date of purchase. If an injector model (single or replacement) is determined to be defective by Lincoln, in its sole discretion, during this warranty period, it will be repaired or replaced, at Lincoln’s discretion, without charge.

SPECIAL LIMITED 5 YEAR WARRANTY-
Series 20, 25, 40 Bare Pumps, PMV Bare Pumps, Heavy Duty and 94000 Series Bare Reels
Lincoln warrants series 20, 25, 40 bare pumps, PMV bare pumps, Heavy Duty (82206), Mini Bench (81133, 81323), and 94000 LFR series (94100, 94300, 94500) bare reels to be free from defects in material and workmanship for five (5) years following the date of purchase. If equipment is determined by Lincoln, in its sole discretion, to be defective during the first year of the warranty period, it will be repaired or replaced at Lincoln’s discretion, without charge. In years two (2) and three (3), the warranty on this equipment is limited to repair with Lincoln paying parts and labor only. In years four (4) and five (5), the warranty on this equipment is limited to repair with Lincoln paying for parts only.

SPECIAL LIMITED 5 YEAR WARRANTY-
LFM Series Oil Meters (Lincoln Fluid Meter), LFV (Lincoln Fluid Valves), AOD (Air-Operated Diaphragm Pumps)-
Lincoln warrants the LFM meter series (908/912 series), the Lincoln Fluid valve (708/712 series), our Universal Inline Digital Meters (812/813 series), and our AOD Pump offering to be free from defects in material and workmanship for five (5) years following the date of purchase. If either is determined to be defective by Lincoln, in its sole discretion, during the warranty period, they will be repaired or replaced, at Lincoln’s discretion, without charge.
